Lessons Learned

What do you like most about the product or service?

Legit automatically identified repositories in Github and produces various health reports on them. This allows us to run our product security with a guardrail approach rather than a tollgate approach. This in turn has resulted in better partnership between security and product engineering as well as fostering their ability to ship secure code faster.

What do you dislike most about the product or service?

It could use more integrations and the secrets identification is not foolproof.

Please explain the business problems or needs that prompted the purchase of this product or service.

Reviewer Profile

 Chief Information Security Officer

Industry:
IT Services

Function:
IT Security and Risk Management

Firm Size:
1B - 3B USD

 Deployment Architecture:
Cloud (SaaS or PaaS or IaaS)

 Go-Live Date:
2021

 Implementation Strategy:
Worked with just the vendor

This review was submitted organically.

[Community Guidelines](#)

We were looking for something to help us secure the various code pipelines that our product teams use. In particular we wanted something that would seamlessly integrate into our development processes without adding additional friction so that our product teams could ship secure code in the fastest way possible.

Evaluation & Contracting

Why did you purchase this product or service?

- Improve compliance & risk management
- Improve business process agility
- Improve business process outcomes

What were the key factors that drove your decision?

- Strong customer focus
- Product functionality and performance
- Product roadmap and future vision

Which other vendors did you consider in your evaluation?

- Anomali
- Devo
- Cyware

Integration & Deployment

How extensively is this product or service being used in your organization?

Company-wide

When was this product or service deployed at your organization?

2021

How long did your deployment take?

0 - 3 months (<3)

What was your implementation strategy?

[✉ Email Page](#)

[📄 Download PDF](#)

Was this review helpful?

[👍 Yes](#)

[👎 No](#)

Worked with just the vendor

Service & Support

Product Capabilities

Additional Context

Deployment architecture

Cloud (SaaS or PaaS or IaaS)

In which country(s) did your deployment take place?

United States

How long have you used this product or service?

2 years to less than 5 years

How frequently do you use this product or service?

Daily
