

# Legit Security Saves You Time and Money

How Legit's Application Security Posture Management (ASPM) Platform Drives Efficiency

1

## AppSec team efficiency and effectiveness starts with vulnerability management

CHALLENGES

**100k**  
Avg. vulnerability backlog in 2/3 of large organizations

**35k**  
Hours to remediate the backlog of production vulnerabilities

**21 min.**  
Avg. time to remediate one vulnerability in production

**1yr 9 mo**  
FTE equivalent to fix avg. vulnerability backlog

**50%**  
Organizations lack resources to remediate application vulnerabilities quickly

Meanwhile the threats are growing...

**32%**  
Projected threat acceleration by 2026

2

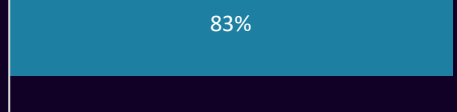

## SaaS sprawl and Shadow IT are expensive and risky

### SaaS Sprawl

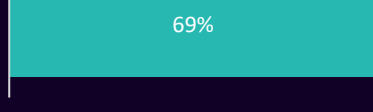

**\$135k** Average annual spending on unnecessary software licenses

### Shadow IT Risks

IT teams say enforcing cyber security policies is impossible for shadow IT

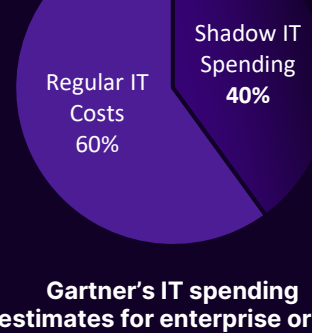

IT executives feel that shadow IT is a top concern

3

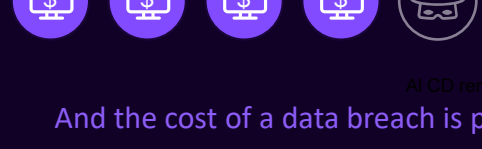

## Financial Impact of Shadow IT

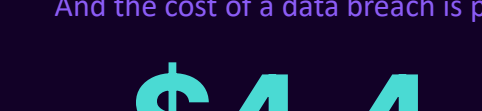

Gartner's IT spending estimates for enterprise orgs.

4

## Shadow IT Attack Surface

One in three successful cyber attacks will come from shadow IT

One in five organizations experienced a security event due to shadow IT

And the cost of a data breach is prohibitively expensive...

**\$4.4 Mil.** Average cost of a data breach

SOLUTIONS

1

## Drastically Improving Efficiency with ASPM

### ASPM Delivers Quantifiable Value

**42%**  
Time gained for security analysts to work on the broader initiatives and tasks

**23%**  
Time gained for developers to innovate instead of fixing vulnerabilities

To learn more about how this is possible, download our [Why You Need ASPM Now Infographic](#)

KEY TAKEAWAY

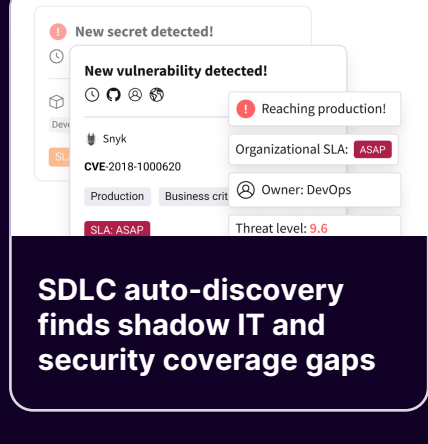

### ASPM allows organizations to realize:

Savings of **\$28,014** per analyst

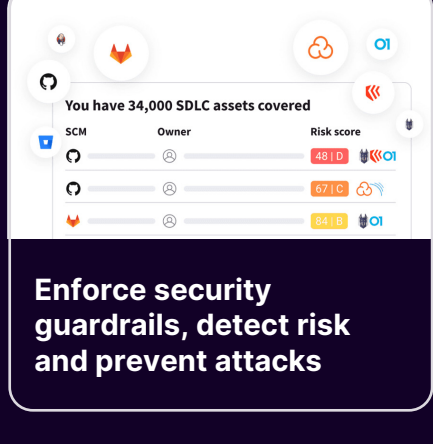

Savings of **\$47,565** per developer

2

## Control Risky Shadow IT and Sprawl with ASPM

SDLC auto-discovery finds shadow IT and security coverage gaps

Enforce security guardrails, detect risk and prevent attacks

**25%** Up to 25% reduction in shadow IT is possible with ASPM and could give organizations up to 10% of their IT budget back.

KEY TAKEAWAY

Legit Security's platform offers these capabilities and much more.
